Lithuania

Description

We aim to create a better and more delightful experience for live concert lovers while empowering the musicians by helping them gain their freedom back and unleash their creativity. We do this through leveraging blockchain technology and NFTs, coupled with some of the greatest tech creatives in the industry.

Music-related NFT Marketplace and NFT ticketing Platform are 2 main our products.

Marketplace MVP is in the finish straight, and ticketing architecture is just about to start.

We are a Norwegian – Estonian – Lithuanian group of companies. IDO and token launched in Estonian jurisdiction. In Lithuania, we have 4 companies for international operations, Crypto exchange, and wallet custodial licenses, development. All of the group is controlled by a Norwegian holding company, owned by doxed cofounders.

David Norberg (CEO) – long-term fashion and music industry guy.

Martin Bjercke aka CLMD (creative director) – 14 platinum award DJ, over a billion streams on Spotify.

Bjorn Bjercke aka Mr. Bitcoin Norway – blockchain expert.

Tomas Vėbra (COO) – business „backend" and

operations, CEO for LT daughter companies.

Currently, we are looking for core team members to join the ride together:

Tech Lead - Senior Solution Architect, DevOps

What will you do:

Solutions Architects work on solving real-world business problems with the Centaurify web3 product suite. We goal ourselves on the success of every developer on our platform, and through a combination of technical, entrepreneurial, and interpersonal skills, we develop deep insights into both business and technology, innovating to build the right solution to meet customers' needs where they are.

What will you bring:

Acquire a deep technical understanding of Centaurify products and their alignment to customers' business needs.

Take full ownership of tech team management, development, and delivery processes.

Ensure customer success by recommending, architecting, and delivering web3 solutions to customers.

Hands-on approach as you would be requested to code most of the time.

Set the scope, prioritize and align activities based on business and customer impact

Collaborate with the technical teams to deliver innovative solutions with quick time-to-market and optimal resources allocation.

Have full control over the application management, by ensuring quality deliverables, and using a cloud platform, monitoring tools, and databases.

Leverage soft skills and technical skills to manage stakeholder relationships both internal and external.

Build reference architectures and best practices that can be shared across the developer team.

Propose new solutions through technical documentation, and gain consensus from your stakeholders.

Participate in knowledge-sharing sessions, mentoring other team members on your area of expertise.

Contribute to hiring and onboarding new team members.

Basic Qualifications:

- 5+ years as a Senior Solutions Architect and backend developer;
- Experience designing and architecting Enterprise-grade scalable software systems;
- Experience with distributed systems, security, provisioning, and other aspects of software delivery;
- Experience communicating to non-technical audiences and working with non-technical stakeholders;
- Understanding of blockchain technology and Ethereum/Solana stacks;
- Experience architecting decentralized applications on Ethereum/Solana (Solidity, Web3.js, Ethers.js, Rust, NodeJS, etc.);
- Experience dealing with relational and non-relational DBs;
- Broad knowledge of web3 technologies and blockchain ecosystem;
- Experience contributing to developer documentation or educational materials;
- Proficiency in Rust, JavaScript, NodeJS;
- Profound knowledge of AWS cloud platform and Linux-based systems.
