Apie Mane

I am Enterprise Solution Architect with more than 20 years of experience in IT and more than 5 years of experience as Solution Architect. I am certified in TOGAF methodology (TOGAF Foundation Certification). As Solution Architect I have very good knowledge and a lot of experience working with online and client service omni-channel systems, CRM, integrations (ESB, WS) and backoffice systems like billing, asset management and others. I also have very good knowledge of both Agile and Waterfall methodologies and have experience in working with vendors and inside development teams (Agile or not).

My main responsibilities are to understand business and technological processes and to create solution for client using various enterprise systems. I create high level architecture and give business and technological support during all the solution implementation phases.
