Personal Statement

I am currently looking for opportunities as a Senior Developer, Software Architect or a Product Owner. I have almost 6 years of experience in IT industry. Throughout the years I have served as a developer designing and building the software, consultant consulting companies clients on our product and software architect responsible for tackling customer needs and overall product innovation. The last year I have been working as an architect for a new product, I was responsible for designing and building an insurance software application from the ground up. I have developed a vision for parts of the system, I have built plans, provided estimates, designed and implemented solutions.

I have strong analytical, problem solving and communication skills.
