### Description

*4finance IT is an exciting FinTech company that has revolutionized the online consumer finance industry.*

State-of-the-art software is at the heart of our business and the main driver of our future growth. Discover what it's like to be part of a team that rewards taking risks and trying new things.

#### It's time to love what you do!

*We give you an entrepreneurial work environment to be bold, curious and pioneering in your job.*

To achieve excellent results, you will have the professional freedom to strive for creative solutions in complex situations. Together we will put people first, be it our colleagues or customers - they are at the heart of everything we do! Together with You, we will create products for people who are financially underserved, and we will do this in a responsible way.

#### Responsibilities

- Developing new user-facing features using React.js
- Collaborate cross-functionally with other teams, including UX, back-end, research, data science, product management and other
- Building reusable components and front-end

- libraries for future use
- Translating designs and wireframes into high quality code
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Participate in the full life cycle of an agile project and design and develop user interfaces/applications and conduct testing.
- Other business duties as assigned

### **Experience**

- Experience of working in a lean, iterative manner; ability to work closely with in-country teams, clients and respond to change
- Write high quality, well-tested code
- Strive to constantly learn new things
- Ability to research, develop and communicate quality technical designs, concepts, and recommendations
- A passion for working as part of a progressive, collaborative, agile and Scrum environment
- Technical skills
- Very strong knowledge of React.js framework and its ecosystem (Redux, server-side rendering, Node.js) or any other modern JavaScript
- Experience with Redux, Webpack, Yarn
- Experience with headless CMSs
- Familiar working with REST APIs
- Build reusable components and front-end libraries for future use
- Knowledge of GIT
- Excellent verbal and written English

### **Nice to have**

- Experience with Webflow
- Experience with React Native
- Experience with headless CMSs
- Experience with Jest, Cypress.io, or other test framework
- Knowledge of State Machines and Statecharts
- Knowledge of TypeScript

### **Our offer**

- Challenging projects that you will have a real impact on
- One of a kind employee development program to support you in your personal and professional development
- Competitive salary + benefits (Multisport card,

Individual development plans, Hello world gifts, Birthday & X-mass presents, Modern Office, Events / Team Building, Fruits/Breakfasts in the office, Teleworking, Flexible working, Meal vouchers, 2 additional paid sick days, 25 days of holidays, Parking, Chill out zone, Employee Referral Program)

- Home office ;)
