## Aprašymas

We are currently looking for a Freelance Data Engineer.

### General Information:

- Contractor location in Poland.
- Remote.
- Contract duration: April 2025 - End of Year (possibility of extension)
- Language: English

### Responsibilities:

- Develop and manage efficient data pipelines for extracting and transforming data from **Dynamics 365 FO**.
- Design **data storage and integration solutions** that align with analytical and business needs.
- Optimize **data processing workflows** to ensure scalability and high performance.
- Collaborate closely with **BI and business teams** to structure and prepare data for analytical purposes.
- Maintain **data governance standards**, ensure data quality, and document data flows effectively.
- Implement **performance optimization strategies** for data queries and storage solutions.

### Required Skills:

- Hands-on experience with **data ingestion and**

**transformation from Dynamics 365 FO.**

- Proficiency in **SQL, Azure Data Factory, Synapse or Databricks** for data processing.
- Strong background in **ETL/ELT architectures** and working with **relational and cloud databases (Azure)**.
- Understanding of **data governance principles** and expertise in **data modeling**.
- Strong communication skills to collaborate effectively with **BI and business stakeholders**.
- Experience with **scripting (Python, PowerShell)** for task automation is a plus.

**Preferred Qualifications:**

- **3 to 5 years** of experience in **data engineering**.
- Direct experience with **Microsoft Dynamics 365 FO and its data model**.
- Ability to lead **data transformation and integration projects**.
- **Microsoft Azure Data Engineer certification** is a plus.

## Required Skills

### **REALIZACIJA**

**Data Management 4-5 metai**
