Description

New opportunity for Freelance Full Stack developer (React+.NET) for project in Anti Money Laundering program.

About Danske Group IT

It is a part of an organization, which delivers world-class digital financial solutions to customers. They understand that the current change is Technology-driven, and we prioritize IT as a key component for success in their journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy, and lead improvement. One more important feature is that senior leadership is present on-site.

Responsibilities:

Consultant will be part of the team designing pricing solutions used for calculating price metrics, profitability and additional cost forecasts on bank offerings for enterprise customers. Main applications consist of various calculative API's, React frontend and

multiple AWS services designed together with an Architect and the team. The new interface acts as a steppingstone to exit legacy on-premises system before users are moved to a new Pricing system developed using .NET on AWS (Amazon Web Services) Cloud, React and SQL elements involving complex data integrations and calculations. Consultant will join other .NET, React developers, DevOps specialists, IT System analysts, and Business analysts - all working in cross-functional squads to deliver up-to-date technology solutions. Consultant will:

- Design and develop software that is trusted, testable in automated way, easily maintainable, and resilient.
- Work with .NET, MS SQL, DynamoDB, Azure DevOps, JIRA, AWS, React etc.
- Closely collaborate with business users and different teams inside the bank
- Improve the way we do things
- Be agile and spread these ideas among the team.

Requirements:

- 5+ years of experience
- In-depth knowledge of different API types - REST, SOAP, XML, RPC, GraphQL and similar
- Practical experience with frontend frameworks (React preferably, Angular, or etc.)
- Proactivity and technical support for Product Owner and team
- Experience with correct API versioning strategies
- C# with .NET Framework or .NET Core
- MS SQL or similar relational database
- Experience with public cloud providers like AWS preferably, Azure or Google Cloud is a requirement.
- Automated testing (Unit, Integration, E2E)
- RESTful architecture
- GIT
- Ability to maintain and use DevOps pipelines, created by professionals.
- Advanced English language skills

Additional great to have:

- Be familiar with AWS lambdas and API Gateway (creating and managing descent size system based on these technologies)
- Knowledge in using build and deployment pipelines for cloud services using Azure Devops, Docker, Kubernetes, or other technologies.
- Good understanding of development lifecycle process and agile practices
- Their current technology stack, which you will influence moving further is .NET C#, Azure DevOps, AWS, GIT, Containerization, SonarQube, MS SQL Server, DynamoDB, React.

Company offers:

- An inspiring environment in a large IT organization
- Work in an international team, which concentrates on innovative business-facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
