## Description

New opportunity for Freelance Senior Data Engineer - in Finance Tribe.

### About Danske Group IT:

It is a part of an organization, which delivers world-class digital financial solutions to customers. They understand that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy, and lead improvement. One more important feature is that senior leadership is present on-site.

### Responsibilities:

- Develop and implement a PoC for data quality and management.
- Establish objective controls to ensure data integrity.
- Utilise machine learning to analyse and predict data accuracy.
- Employ AWS services to build robust data solutions.

- Collaborate with the Finance Tribe and Function Area to create best practice patterns in data management.

**Requirements:**

- Proven experience as a Data Engineer, preferably within the finance sector.
- Strong proficiency in AWS services, including Glue and SageMaker – preferably also an Associate AWS Data Engineer certification.
- Experience with data quality and management frameworks.
- Solid understanding of machine learning concepts and applications.
- Excellent problem-solving skills and attention to detail.

**Years of experience: 5+****Preferred start date/end date:**

- ASAP for 6 months assignment (preferred start date: 01-04-2025)

**Company offers:**

- An inspiring environment in a large IT organization
- Work in an international team, which concentrates on innovative business-facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
