### Description:

#### The Challenge

You will maintain, optimize and create the new functionality of the market leader in Western Europe for real-time information for the metal recycling industry.

It's an official distributor for the world's biggest metal exchanges, has its own price network and offers supplementary tools that help people in the metal recycling industry to make educated commercial decisions using their desktop, iPhone, Android or Blackberry clients. These tools are used throughout the day by users from over 40 countries worldwide. Hundreds of prices change every second. Data and the real-time aspect of it is crucial, along with the stability of the platform.

#### Responsibilities:

- Build and test automation tools for infrastructure provisioning
- Build, maintain, and monitor configuration standards
- Monitor metrics and develop ways to improve

- Maintain day-to-day management and administration of application
- Document and design various processes; update existing processes
