## Aprašymas:

Danske Bank Group IT Lithuania (DGITL) is a part of an organization which delivers world-class digital financial solutions to customers. DGITL teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy and lead improvement.

### **About the role:**

You will be working with Sunday digital solution for home buyers and owners. You will be working in an environment where the agile mindset is taken seriously and where you have possibility to make a difference and leave a mark if you find situations where we could do better. You will design and build services for scale, performance, and reliability. You understand and have an overview of the business processes that you are supporting as part of the overall solution. We are keen on pair programming as well as a pair review culture and we expect you to be able to present your ideas in both.

### **Responsibilities:**

You will work with Sunday Back-end service integration into Danske Bank's platform. You will develop the logic to tie to the customer facing part of the solutions to API's and services developed on existing bank's platforms.

### **Requirements:**

- BA+ in Computer science, Math or Physics
- C#
- Micro services
- RESTful architecture
- Tidy and solid code
- Code and architect
- TDD
- VCS (GIT & TFS)
- Domain driven design
- Testing suites and unit tests

**We expect that you are:**

- Optimist and inspiring person
- Open-minded team player
- Innovative and creative problem solver
- Disciplined hands on developer

**Company offers:**

- International team, working on innovative user facing solutions
- Knowledge sharing and daily learning from skilled peers
- Regular training to ensure that your skills are always top-notch
- Highly skilled cross-functional team
- Further cross team career options
- A collaborative Scandinavian culture
- Location: Vilnius or Kaunas

**Reikalinga Patirtis**
