### Aprašymas

Versada is looking for a Lead Python Developer to work with Odoo ERP projects. Odoo is one of the fastest growing open source ERP systems in the world. The open-source development model of Odoo has allowed thousands of developers and business experts to build the world's largest ecosystem of fully integrated business apps.

Projects vary from service to manufacturing companies, from local to international. You are going to work with experienced solution architects of Odoo in Versada, with technically strong developers and interesting, accurately selected projects. We value quality over quantity and being transparent with each other and with our clients.

Versada is working for 4 days a week (there is also an option to work 5 days, paid additionally). All the team is technical and candidates will communicate with the technical background CEO directly.

#### **Main Duties and Responsibilities**

- Work closely with business stakeholders and other members of the development team to ensure timely completion of deliverables;
- Determine appropriate technical solutions and make relevant recommendations to stakeholders;

- Ensure our high quality standards and improve them;
- Consult team members to choose the right solution/architecture;
- Customize Odoo ERP based on requirements using reusable, testable, and efficient code or build vertical solutions from scratch based on Odoo framework;
- Implement best practices and ensure code and process quality through regular code reviews, proper documentation, and improvement initiatives;
- Ensure all features delivered are seamlessly released to the production environment and perform reliably at all time;
- Free space for our team development environment improvements e.g. quality, performance, devops.

### **Requirements**

- 4+ years of experience with Python;
- Good knowledge of Linux;
- Technical leadership and excellent communication skills;
- Strong organizational skills;
- 2+ years experience with Odoo (big advantage);
- Interest in DevOps or front-end stack (an advantage).

### **About Versada**

We seek to help enterprises digitize their business processes and improve employees workflows with Odoo ERP.

- We pay for your experience: Hourly rate, 4 working days week, bonus system, open wages;
- Ideal working conditions: Flexible working hours, ability to work in Kaunas or Vilnius office, or remotely;
- Great and professional team: Open minded culture, flat organization structure, technical background team;
- Team buildings and workations, Monthly meetings, Annual summer camps.

More about Versada: [www.versada.eu](http://www.versada.eu).

More about Odoo: [www.odoo.com](http://www.odoo.com).

Gross monthly salary: starting from 3500 EUR (the upper range of the salary depends on your skills and competences).

### Required Skills

PROGRAMAVIMAS
