Aprašymas:

FinTech company SDK.finance is looking for a QA Automation Engineer.

If you have a passion for testing methodologies and want to improve the quality of our product - do not hesitate, feel free to contact us and send your CV. We are waiting for you!

Required skills:

— Experience at least 2 years in Test Automation;

— Knowledge of SDLC;

— Java Programming skills (OOP, collections, JSON parsing);

— Maven/Gradle knowledge;

— Test automation design skills (Modularity, SOLID, composition, Singleton)

— Strong experience in REST API testing (RestAssured, Postman);

— Proven Experience with CI/CD (Gitlab CI, Jenkins);

— Git workflow knowledge;

— Understanding Agile Development Techniques;

— Good communication skills;

— Level of English strong intrm+.

Nice to have:

— BDD Frameworks knowledge (Cucumber, Serenity);

— Web UI automation testing (Selenium WebDriver, Cypress);

— Mobile automation testing (Appium, Expresso, XUI Test);

Responsibilities:

— Automation of regression and other functional testing on API services;

— Building and maintaining automated testing frameworks

— Integrating automated testing into CI processes

— Test case adjustments for automated testing needs

— Test data and test environment preparations

— Making conclusions and reporting about the stability of the product under test

— Communication with developers and project managers

— Design and development of Test Cases;

— Creating maintainable test artifacts also traceable to requirements;

— Contributing toward predictable delivery of quality release.
