Aprašymas:

Do you enjoy being surrounded and collaborating with like-minded and talented people who have a passion to innovate? TransUnion provides innovative solutions that help ordinary people and businesses create economic opportunity and personal empowerment for hundreds of millions of people in more than 30 countries. So if you want to join a growing, inspiring and forward thinking business, come, join your new team here at TransUnion Lithuania!

What You'll Bring:

- Sound knowledge of network security tooling for Intrusion prevention systems (IPS), Web Application Firewalls (WAF), Network Packet Broker (NPB), Network Detection & Response (NDR) & Proxy. Strong knowledge in one or more of these technologies.
- Knowledge of information security concepts, OWASP web application vulnerabilities, risk identification, assessment and reporting activities.
- Strong networking knowledge (TCP/IP, BGP, OSPF, IP addressing, DNS, VLAN's, subnets, analyzing packet captures etc.). In-depth understanding of networking protocols, ISO Model (Layer 1 to Layer

7) and expert knowledge on network firewall concepts and configuration.

- Experience deploying, configuring & maintaining network security tools. Evaluate and install patches, perform system upgrades and resolves security issues.
- Strong triaging and troubleshooting skills.
- Prior experience working in Tier1/Tier 2 security operations & support.
- Able to conduct research and support development of information security policies, standards, procedures, and/or guidelines.
- Adept at security monitoring, and investigation activities.
- Strong communication skills.

Desired skills:

- 2+ years of experience in network security engineering.
- 2+ years of working in a Security Operations Center (SOC).
- 3+ years of networking experience, including configuring, analyzing & troubleshooting complex TCP/IP networks.
- Experience creating support process and establishing run books highly preferred.
- Experience with cloud technologies like AWS, Azure, GCP. Experience with cloud automation in security domain (scripting using PERL, Python, Ruby or Ansible.)

Impact You'll Make:

- Deploy, configure & maintain network security tooling like Intrusion prevention systems (IPS), Web Application Firewalls (WAF), Network Packet Broker (NPB), Network Detection & Response (NDR) & Proxy.
- Support investigation of security incidents. Support business continuity risk management and disaster recovery planning activities.
- Resolve Tier1/Tier 2support tickets for network security globally. Meet necessary SLA's for resolution of issues. Escalate Tier 3 level issues to engineering lead to seek assistance and advice on issues and drive resolution. Work with security solution vendors as required.
- Support activities pertaining to migration of security tools to cloud (design reviews,

automation, operations process etc.)
- Contribute to agile project planning & delivery.
- In the first 90 days – Ramp up to project specifics. Focus on 1 or 2 security tool based on immediate needs and support associated new deployments either on premise or cloud. Support existing deployments to respond to break/fix, apply security patches & respond to security incidents.
- Beyond 90 days – Effectively perform new network security deployments independently across TU regions with support from local resources. Participate/contribute in Tier 3 support activities and BAU as needed.

As a Network Security Engineer here, you will be a part of our Network Security team to provide support for engineering and operations of security tooling which is key to meeting and providing the robust security for TransUnion web based applications & assets. You will have opportunity contribute to our cloud technology modernization effort by working on & supporting SaaS & AWS based security tools.

What you'll get in return:

- Experienced and highly motivated team
- Big focus on project delivery quality
- Health insurance package
- Business/Individual performance-based annual bonuses
- Financial rewards for Azure/AWS certifications
- Well defined career growth path using a matrix of skills needed to move on to the next level
- Dedicated training budget for professional improvement
- Linux Academy, Ministry of Testing, LinkedIn learning zone memberships
- Modern 2500 square meter office in Zalgiris arena with free parking
- Free of charge entry to Zalgiris LKL and Euroleague basketball games in VIP Zalgiris box
- Regular team events such as team buildings, summer/winter parties, sports & retreats
- Opportunity to participate in TransUnion Share purchase plan
- Flexible working and work-life balance
- Salary range from **2900 to 3500** EUR/month gross.
