Apie Mane

Searching for main programmer or lead programmer job or just a project as freelancer. I have 10 years experience of programming using PHP, MySQL, JavaScript and 4 years experience of leading programmer team. Have been developing portals with daily visitor count about 10.000 – 20.000, web based software for heat map and back link tracking, affiliate management, specialized systems for real estate (system involved realtors, attorneys, real estate organizations (managers, administrators), photographers, processors), task management systems, SERP monitoring, Automated text rewriting and content analysis system. Have experience in doing website inside and outside SEO. Have experience with other programming languages: classic asp, Pascal, Delphi, C, C++, Action script. Have been using PHP frameworks: Codeigniter, Zend, and personal built. Have experience with web and email marketing. Love challenges and solving problems in creative ways, not only using standard procedures but trying to look at problem from all sides. Believe that all things can be done just need some time and some googling (to find ideas that will lead to sollution).
