Any

Current status

Working (Hit me with offer) (Updated: 1 month ago)

Workload

100%

Personal Statement

I am an experienced developer, striving to be on the edge of the latest technologies. Improving solutions and work process is what I love to do. I am self-motivated to work in team as well as independently to build best possible solution. I am a very committed person always giving more than 100% and ensuring that what I have promised will be delivered. My goal is to write clean, testable code with the highest performance, suitable for continues delivery. User Experience is one of the main focus. I like to use User Centred Design (UDC) methods for the software I am developing. Automated code testing, as well as automated build process is the need for todays software development.

Skill Stack

WEB	METHODS
HTML +6 years	OOP 3-4 years
