Apie Mane

I help clients to figure out their business processes, set measurable goals and reach them by developing or adopting web solutions.

I have over 7 years of experience working in retail, e-commerce, services and manufacture sectors where I have held six different roles and increased revenue through my practical knowledge of information technologies, relationship-building and networking. I have graduated various sales, marketing, google analytics and adwords trainings too.

All of these let me feel well-versed when executing and talking about CRM, ERP, custom software development, business analysis and management, sales.

When I'm not on the job, I love develop my own small ideas, write educational and personally tested recommendations in blog.

If you'd like to learn more about how my knowledge can help your company, please reach out via email (tomas@baltus.is).
