Apie Mane

I am interested in designing, developing and deploying iOS and Android apps. Have good understanding about mobile application lifecycle. In 2010, when I was working in Vodafone Group GmbH, I switched from Symbian to iOS platform. During this period I got a lot of experience for iOS platform: Objective-c, Swift, TDD Test Driven Development, CoreData, UI Automation, localisations, storyboards, Xcode, SpriteKit and etc. I am good team player and as stand alone developer. Prefer to work using SCRUM methodology.
