Personal Statement

A passionate Microsoft .NET Developer, with 12 years professional experience and 8 year .NET experience with master degree in computer science.

Currently working as a Senior Software Developer with SaaS solution covering demands for Norwegian Kindergarten administration.

I am allways interested in learning new technologies and ways of solving ever changing and evolving IT problems. My goal is to design code that is automated, easily maintainable and scalable.

From the very beginning of my professional career I was driven by challanges and the ways I can solve them, which allowed me to gain experience working with multiple technologies like WebAPI, WCF, MSSQL, MVC and many others.

I had an opportunity to study and work in Germany and Ireland where I had a lot of invaluable experiece that helped me while working in other projects with people from different cultural and personal backgrounds.

I am self-motivated, confident, adaptable, ambitious, willing to learn and take new challenges. Able to work independently, handle multiple tasks and organize priorities.

Currently looking for new challenges and contractual remote work with traveling possibilities.
