Personal Statement

Fullstack WEB development:

- PHP (Zend Framework2, Symfony, Silex, TDD with PHPUnit, Mockery)
- Golang, Java
- Node.js (Express.js, Nunjucks, Sequelize.js, Grunt)
- Frontend (Backbone, Bootstrap, Underscore, sockets, TDD with PhantomJS, Mocha, Sinon.js, Chai.js)
- API services (SOAP, REST, HATEOAS, RabbitMQ)
- Continuous Delivery (Bamboo, Docker, Kubernetes, Ansible automation, Vagrant, Jenkins, Nagios/Zabbix/Datadog monitoring)
- Servers, DevOps (LAMP, Docker, Vagrant, Bash, Nginx, Apache, Debian, MySQL replication, failover solutions, speed optimization, hands on big data)

Also worked with:

- Telecommunication technologies (SMS MO/MT, premium SMS, bulk sms, Kannel, GMS modems, Asterisk, WURFL/WALL, XHTML/WAP)

I am man "infected with illness of informational technologies" long time ago. I am analytic, determined, communicative and always full of creative ideas. I am never satisfied with what I already know and always

ready to improve my knowledge as well as skills. That is why it is not strange for me to fulfill dedicated task at any price.

I am most appreciated for my analytical skills, quality, object-oriented way of thinking, ability to work tidily and professionally.

I just love solving complex IT tasks, employing advanced technologies, designing and developing systems, which “would change the world” :)
