2020-03-05 (Prieš 1 savaitę)

### Aprašymas:

As a Blockchain Developer, you will be responsible for all blockchain applications: from designing and developing, to implementing and supporting new and already existing ones. In this role, you will be working with cryptocurrencies, wallets, smart contracts and decentralized public blockchain-based networks.

#### Responsibilities:

- Implement new features in existing services
- Supervise and support blockchain applications
- Monitor, research and test the newest blockchain technologies
- Document best practices and decision models
- Care about code quality and know what it means to ship high-quality code

#### Requirements

- 2+ years of application development experience
- Working experience with one of the following languages: Java, JavaScript, Python, Solidity and decentralized architectures, Ruby
- Excellent understanding of blockchain: its operation

and architecture

- Ability to deliver high quality, testable code
- Experience working with large codebases
- Good grasp on cryptography
- Higher education degree in Computer Science (Master's degree preferred)
- Experience in Blockchain technology development
- Analytical mind with strong problem-solving skills
- Excellent organizational, communication and interpersonal skills
- Ability to find creative, innovative solutions

### **Company offers**

- Flexible working hours
- Competitive salary
- Exciting and challenging FinTech based projects
- Modern offices
- Professional and personal development
- Office perks and company events
- International and talented team
- Employee referral program

Confidentiality guaranteed. Only selected candidates will be informed.
