Aprašymas:

About the role:

You will become a part of the team in Regulatory Reporting development program in Danske Bank group. The overall purpose of the initiative is to prepare the project and do actual migration to public cloud. Current project is seeking a contractor to shape and speed up the deliveries. You will join other BI Engineers, .NET developers, DevOps professionals, IT Systems, and Business analysts – all working in cross-functional squads to deliver global technology solutions across all financial domains.

About Danske Group IT

They have a substantial backlog of initiatives, delivering on their goals to provide fast & correct financials to investors, regulators, and internal decision-makers as well as optimize the management of the financial resources. They have started their journey to exploit public cloud (AWS) for the benefit of their users and customers. They have high ambitions and target to have the application landscape in Finance Tribe running on public cloud within a short timeframe.

Responsibilities:

- Contractors will be part of the Squad in Vilnius, Lithuania.
- Participate in Scrum Ceremonies, daily development tasks and progress of the area as a whole in order for the Squad to success in delivering IT solutions

- Analyze and plan migration of applications to public cloud.
- Navigate between their public cloud vendor, their tribe and other stakeholders in the bank, remove impediments on your way, enter into and facilitate technical solution discussions

Requirements:

- Backend developer with mid-level experience as a minimum of 3 years of experience and proven track record
- Experience in ELT solution architecture, design, application development and systems integration
- Experience in working in Agile setup with participation in Sprints and reporting to Scrum master
- Experience with projects based on cloud infrastructures (especially AWS, but Azure or Google Cloud is great too) and knowledge of challenges while establishing cloud solutions in a secured environments is a great advantage
- Knowledge of core AWS services – glue, lambda, EC2, RDS, SQS and other is a great advantage

Company Offers:

- An inspiring environment in a large IT organization
- Work in an international team, which concentrates on innovative business facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
