Description

New opportunity for Freelance IT Platform Engineer for Journey Automation team.

About Danske Group IT:

It is a part of an organization, which delivers world-class digital financial solutions to customers. They understand that the current change is Technology-driven, and we prioritize IT as a key component for success in our journey to drive digital disruption in the bank. Their teams work with complex tech challenges and develop Danske Bank's global competitive edge on innovative digital solutions. Teams are driven by job content, share ownership of strategic services, own service strategy, and lead improvement. One more important feature is that senior leadership is present on-site.

Responsibilities:

An IT Platform Engineer ensures the availability, stability, and integrity of the company's Platform. Furthermore, the Engineer monitors, maintains and evolves platform and troubleshoot problems that may arise and in addition to that, the Engineer maintains platform integrity and security.

Requirements:

- Strong understanding of cloud technologies, CI/CD pipelines, and DevOps practices.
- Experience with containerization and orchestration technologies (e.g., Docker, Kubernetes).
- Proficient in at least one programming language (e.g., Python, Java, C#).
- Previous experience with IaC tools (e.g. Terraform).
- Great problem-solving abilities and attention to detail.
- Excellent communication and teamwork skills.

Additional great to have:

- Previous experience in building or enhancing private cloud platform.
- Familiarity with financial services or working in a regulated environment
- Python.

Years of experience: 3+

Preferred start date/end date:

- Asap. For 6 months with further prolongation

Company offers:

- An inspiring environment in a large IT organization
- Work in an international team, which concentrates on innovative business-facing solutions
- An extensive training program to ensure that your skills are maintained and updated on an ongoing basis
