Description

This is a B2B contract. As a self-employed contractor, you are responsible for paying your own taxes in accordance with the legislation of your country.

This is a contract-based position with an initial 6 months, being e Following successful completion of the probation, the contract may be extended for more time based on performance.

For Junior position: hourly pay is from 20 e/h-30 e/h based on your qualification.

For Middle level position: hourly pay is from 30-45 e/h based on your qualification.

The contract will be conducted for 6 months for Junior level candidates and then extended up to 1 year and longer (rolling contract).

The contract will be conducted for 3 months for Middle level candidates and then extended up to 1 year and longer (rolling contract).

Location: Cheb area, Czech Republic.

The company can assist with relocation; any related expenses can be deducted from your pay.

Position Summary

You will be responsible for on-site commissioning and rigorous testing for diverse projects, focusing on system integration and client-specific solutions. **This is a fully on-site position** requiring regular collaboration with project and client teams.

Requirements

- Bachelor's degree in engineering, information technology, or related field.
- Knowledge of network hardware, protocols, and standards, including TCP/IP, FTP, and SOA.
- Knowledge of database design and file management techniques.
- Knowledge of network and PC operating systems, including Linux, Microsoft Windows.
- Good written and verbal communication, including technical writing skills.
- Good Client-facing skills.
- Software Development Lifecycle (SDLC) experience.
- Exposure to project-based work structures, project lifecycle models, etc.
- Team player who works well with technical and non-technical team members and stakeholders.
- Strong interpersonal, organizational, time management, and problem-solving skills.
- Basic English communication and writing skills.

Your Responsibilities

- Working with Software Project Management by participating in project planning activities throughout the lifetime of the project.
- Assisting Software Quality Assurance and Development teams with clarification of requirements.
- Developing test plans to verify the logic of new or modified programs.
- Providing valuable input to R&D and WCS/WES roadmap initiatives identified from Client engagements and feedback.
- Contribute to lessons learned documentation post-project go-live.
- Running onsite test plans to verify the logic of new or modified programs.
- Assisting with Lifecycle Services with high-tier support tickets.
- Remaining abreast of industry technical trends and new developments to maintain current skills

and remain current with industry standards.

- Working closely with the Software team to develop software platforms/applications based on the Client's needs.
- Identify and implement process improvements.

Nice To Have

- Experience in Warehouse Execution Systems (WES)
- Experience in Warehouse Control Systems (WCS)
- Experience in diagnosing transactions in J2EE and C++ environments
- Experience with Agile methodologies
