Description

We are seeking an experienced **Java Developer** to support a new investment services project within the **banking** industry, related to securities purchasing and related enterprise systems. The role focuses on developing and maintaining scalable **Java**-based applications, collaborating with cross-functional teams, and adapting to evolving technical requirements. Experience with **Angular** is also required.

Key Responsibilities:

- Design, develop, and maintain **Java**-based applications and services.
- Support development of enterprise solutions related to investment services and securities processes.
- Collaborate with cross-functional teams to refine and implement technical requirements.
- Troubleshoot and optimize application performance while ensuring code quality.
- Contribute to robust, scalable, and maintainable software systems.

Must-Have Requirements:

- Extensive hands-on experience in **Java** development and related frameworks.
- Experience with **Angular**.
- Proven ability to work on long-term projects with evolving technical requirements.
- Strong analytical and problem-solving skills.
- Ability to work independently in a dynamic

environment.

- Prior experience working in a **banking** environment.

Required Skills

PROGRAMMING

Java 5-6 years

JAVASCRIPT

Angular 1-2 years
