Aprašymas

RIVILĖ is the leading accounting, finance, and ERP system provider in Lithuania. "Financial Times" nominated Rivile as one of "1000 Europe's Fastest Growing Companies 2022". We are building a new cloud SAAS B2B products to break into international markets.

Company invites a **Senior Software Engineer / Tech Lead (JAVA)** to join our team.

Join us if you really desire and can build scalable product for **tens of thousands of companies and individuals**, join us if you want to leave a footprint in our society.

About the role:

- You will be one of the key persons responsible for designing and developing a reusable, secure, stable, and scalable new ERP (Enterprise Resource Planning) product as a web multitenant application using Java;
- Part-time you will be the main person to design and develop a secure, stable, and scalable system, which extends our main product Rivile GAMA as internet based application and develop API backend;
- You will be part of a team of mostly senior developers. You will work in a self-managed team together with other developers, product manager, and designer to create and develop a product that will be easy to use and rich of

functionalities that help companies grow;

- You will ensure system stability by tests, and contribute to improve the system's performance and security.

Requirements

We expect **strong knowledge of Java Spring Boot with 5+ years of experience building SAAS multi-tenant solutions which brings the ability to design and develop solutions based on Event Driven Microservices.**

Requirements of experience (mandatory)

- **Tech. stack:**
- Cloud Services;
- Docker and Kubernetes;
- Java 11+;
- Spring Ecosystem (Core, Boot, Web, Data and Security, Spring Cloud, Spring Integration);
- Hibernate/JPA + Liquibase;
- Databases NoSQL and RDBMS (preferred Postgres/SQL server);
- Understanding of web services, and web security;
- Distributed Cache;
- REST and GraphQL;
- Centralize Logging;
- Telemetry.
- **Work Principles:**
- Domain Driven Design;
- Event Driven Microservices with CQRS (Command and Query Responsibility Segregation);
- Saga design pattern;
- API Contract versioning with backward compatibility support;
- Unit / Integration testing;
- Performance testing;
- Git Flow.

Requirements of experience (preferably, makes you stand out):

- Background in ERP systems would make you really stand out;
- Event Driven frameworks like Axon or Eventuate;
- Different Messaging strategies based on Kafka, RabbitMQ;
- Performance optimizations by Partitioning, Sharding, and horizontal instance scaling by Multi-Tenancy;

- CI/CD with GitHub Actions.

We offer

- Pride - you will see your product in many companies' monitors, tablets, and phones;
- Respect of individual opinion while working on team consensus;
- Lots of freedom and responsibility;
- Trainings/conferences/self-improvement;
- Hybrid workplace Vilnius / Kaunas / from home;
- Market level salary.
