2025-04-30 (4 weeks from now)

## Description

We create powerful, beautiful, and intuitive digital products. We don't blindly follow trends. We take our understanding of the latest technologies and build the best solutions for our enterprise clients. We're big believers in collaboration across engineering, UX, and product teams. We combine our individual expertise to solve complex challenges.

We seek team members who care about results and are not afraid of taking ownership.

### Main responsibilities:

- A Full Stack Engineer is responsible for the design, development, and maintenance of software applications using Java and React;
- This includes working with technologies such as Java, messaging brokers, and ORM, as well as front-end web development technologies such as React, Typescript, HTML, and CSS;
- The Full Stack Engineer will be involved in all aspects of the software development life cycle, including requirement gathering, design, development, testing, and deployment;
- Participating in agile ceremonies such as sprint planning, stand-up meetings, and retrospectives;
- Collaborating with other team members to gather and understand requirements for new features and enhancements;

- Developing and maintaining front-end web components using React, Typescript, HTML, and CSS;
- Designing and developing software using Java, and Hibernate;
- Building and consuming RESTful web services and APIs;
- Writing unit tests and integration tests to ensure code quality and maintainability;
- Participating in code reviews and providing feedback to other team members;
- Troubleshooting and debugging issues;
- Continuously improving the software development process and practices;
- Communicating with stakeholders and other team members to ensure project goals are met;
- Keeping up-to-date with the latest technologies and industry trends to improve the software and the development process.

**Requirements:**

- Strong technical skills and experience with both front-end and back-end development is essential for this role;
- Good knowledge of DDD design patterns, CQRS, and Clean architecture is mandatory;
- Strong React skills are expected;
- Azure Pipelines, Message Brokers, and ORM skills would be considered as an advantage;
- 3-6 years of experience in a software development company with Agile principles;
- Fluent communication in English.

**Benefits:**

- Opportunity to be part of a global organization;
- Encouraging working atmosphere, engaging activities, and extra benefits (e.g. additional medical insurance (covers gym subscription), team events, outreach activities, and others);
- Hybrid work model with remote work opportunities;
- Open, modern, and ergonomic work environment when working from the office with the multicultural community;
- Opportunity to grow professionally and personally (e.g. Udemy) and continuously develop within the domain;
- The salary range for this position is from 4125 EUR to 6875 EUR gross before taxes. The salary offer for the candidate is determined based on

the predefined salary ranges for the position and depends on the candidate's level of competence and experience.

## Required Skills

### **PROGRAMMING**

Java 5-6 years

### **JAVASCRIPT**

React.js 1-2 years
